To whom it may concern,I'm a XM radio listener and it has been brought to my attention that congress is trying to pass a law to band it. Since I received my satellite radio I have not been subjected to listen to the garbage that the radio networks try to throw down everyone's throat. Satellite radio gives me the freedom of listening to my type of music without any commercials or propaganda. Do us a favor and get all the filth off TV and Radio before you start picking on Satellite radio!

Thank you from a concerned satellite radio listener.
